

Turn your grinder's bone collection material into quality ground meat.

Bone Collection Material From Grinder

Piranha

Unusable Waste
(3-10%)

Ground Meat
(90-97%)

Tear into ground meat waste and boost profits with the Piranha.

The Piranha is a revolutionary machine designed to do one thing with ruthless efficiency — extract ground meat from your grinder's bone collector materials. The Piranha efficiently filters the bone from the meat, eliminating unnecessary waste while delivering extra product that would otherwise be discarded. Since nearly all of what comes out of your grinder's bone collector is actually good meat and not bone, the Piranha can quickly pay for itself. The Piranha can turn 90- 97% of your bone collection material into high-quality ground meat. By eliminating a large percentage of waste, the Piranha delivers incredible value because less waste translates into more profits.

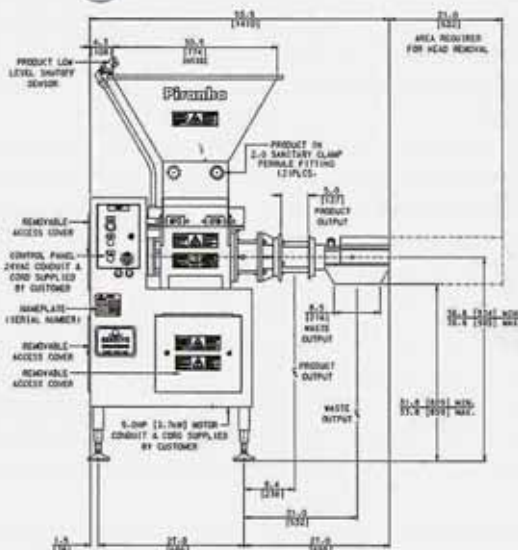

Works in tandem
with your grinder!

Hopper tilts back
for easy access
and cleaning.

SPECIFICATIONS & FEATURES

- Input capacity (varies with product):
500 - 1500 lb./hr. (227-680 kg./hr.)
- Total horsepower: 5 hp (3.73 kw.)
- Hopper capacity: 3.25 cu. ft. (92 liters)
- Slow auger speed to preserve product quality
- Machine-mounted controls
- Stainless steel unibody construction
- On site operator and maintenance training included
- Parts storage/cleanup station included
